12 November 2020

Dear Ms. Cheng,

Project Profile for Drainage Improvement Works at Nam Wa Po

Green Power would like to draw your kind attention to our comments about the above-captioned Project Profile.

1. The proposed drainage improvement works mainly take place in the ecologically non-sensitive brownfields and developed areas whereas the works shall not disturb the adjoining natural woodland and other stream sections around the hillside area.
2. Relocation of native Small Snakehead (*Channa asiatica*) shall be conducted at night time, in which the ecologist would have a higher chance to spot the fishes.
3. The project area falls within the water gathering ground, the project proponent is responsible for strictly following the WSD's guideline "*Conditions of Working within Water Gathering Ground*" in protecting the potable water.
4. In particular, the construction materials shall be stored properly and the workers shall not be allowed to wash the instruments, equipment, clothes, and utensils in streams or water bodies or that will generate polluted surface runoff feeding Ma Wat River.

Thank you very much for your kind attention. For any inquiries, please contact the undersigned at Green Power (T: 39610200, F: 2314 2661, Email: wflo@greenpower.org.hk).

Yours faithfully,

LO Wing-fung
Assistant Senior Education & Conservation Officer
